## ABOUT MYSELF

Currently studying Computer and Multimedia Engineering to bridge the gap between imagination and execution. I chose this path because I believe a solid technical foundation is essential for the creative work I love to do. Engineering is helping me gain the independence to build projects from scratch as I work to balance technical functionality with creative ideas.

## EDUCATION & TRAINING

**09/09/2020 - 30/06/2023** Almada, Portugal

**Course of Science and Technology** Escola Secundária Daniel Sampaio

**Level in EQF:** EQF level 5

**11/09/2023 - CURRENT** Lisbon, Portugal

**Bachelor Degree in Computer and Multimedia Engineering** Lisbon School of Engineering

- **Virtual Environments Modeling (20/20)**
- **Animation of Virtual Environments (19/20)**
- **Game Design (19/20)**
- Visual Design (18/20)
- Mathematics for Computer Graphics (18/20)
- Human-Computer Interaction (17/20)
- Multimedia Authoring (17/20)

**Final grade:** Current Overall Average: 16/20 | **Level in EQF:** EQF level 6

## CREATIVE WORKS

**01/08/2025 - Current**

**Personal Project – Revervox & Voice Chat Recording API (Minecraft Mods)**

Developed a high-performance **Java API** and companion horror mod with **300,000+ total downloads**, enabling real-time voice capture and mimicry in Minecraft.

Leveraged the API to build **Revervox**, a multiplayer horror experience featuring AI entities that autonomously record, filter, and replay player voices to create immersive psychological gameplay.

## PROJECTS

**19/02/2025 - 13/06/2025**

**Gamble & Survive - 3D Game**

Engineered a 3D Unity game featuring modular **AI, Weapon, and Leveling systems.**

Developed a custom **Blackjack mini-game** with dedicated logic and UI, integrated into the core gameplay loop.

Designed and programmed all player mechanics, including movement, combat, and progression stats in **C#**.

**09/09/2025 - 07/01/2026**

### MonoTown - Mobile 3D Game

Developed custom mechanics that transform device hardware (such as the **gyroscope and microphone)** into interactive puzzle-solving tools.

Focused on creating a unique user experience through creative hardware integration.

**21/08/2025 - Current**

### Freelance Game Mod Developer

Developed specialized Minecraft mods for YouTube creators with a **combined 1.5M subscribers**. Responsible for end-to-end development of custom game mechanics, performance optimization, and technical support for large-scale audience distribution.

## VOLUNTEERING

**26/03/2025 - 29/03/2025** FIL - Feira Internacional de Lisboa

### Futurália 2025

Represented Lisbon School of Engineering at Portugal's largest education fair, advising prospective students on degree programs, admission requirements, and campus life.

## DEVELOPMENT ENVIRONMENTS & TOOLS

### Programming Environments

- IntelliJ IDEA
- **Visual Studio (Unity C#)**
- Visual Studio Code
- Eclipse IDE for Java/Kotlin Developers
- Jupyter Notebook

### Other

- Microsoft Office
- **Blockbench and Blender**
- GitHub
- Adobe Illustrator, Photoshop & InDesign
- Docker

## SKILLS

Java (computer programming) | Python (computer programming) | CSS & HTML | JavaScript | Android Studio | C# (Unity) | SQL

## LANGUAGE SKILLS

**MOTHER TONGUE(S):** Portuguese
**OTHER LANGUAGE(S):**

**English**

**Listening** C2
**Reading** C1
**Writing** B2
**Spoken production** C1
**Spoken interaction** C1
